

Sanjila Gangaju

Frontend Developer

AanbuKhaireni , Tanahun • 9806770060 • canzilagangaju@gmail.com

 @ github.com/SanjilaGangaju  @ linkedin.com/in/sanjilagangaju/

Frontend Developer focused on turning ideas into polished, intuitive digital products. Strong in UI/UX, creative problem-solving, and building web and mobile experiences with React, React Native, and TypeScript. Experienced in taking products from concept and design through implementation and production.

EXPERIENCE

Software Developer

India (Remote)

Shastack

Nov, 2025 - Present

- Owned end-to-end development of HausWise, a production React Native + TypeScript SaaS application for iOS and Android, contributing across UI/UX design, feature development, backend integration, testing, debugging, analytics, and production releases.
- Developed core product functionality and the Admin Dashboard using Supabase, PostgreSQL, authentication, and Row Level Security (RLS), implementing secure, role-based workflows and apartment-scoped data management.
- Contributed to Staffcoder, a coding assessment and practice platform, taking features from UI/UX prototyping and product design through frontend implementation and backend integration, including dashboards, profiles, user progress, streaks, and practice-based assessment workflows.
- Implemented Firebase Analytics and custom event tracking, participated in code reviews and debugging, and worked across the product lifecycle to improve reliability, usability, and feature delivery.
- Leveraged **AI-assisted development** for technical research, prototyping, debugging, and implementation, while also contributing to product strategy, promotional video production, creative content, and social media initiatives.

Web and Frontend Intern

Kathmandu

Frost Digital Ventures Pvt.Ltd

Sep, 2025 - Nov, 2025

- Contributed to the trade web application, developing multi-step form with integrated validations and Bank Correspondance UI using React, TypeScript, React Hook Form, and Yup Schema.
- Translated Figma designs into responsive, accessible interfaces following Atomic Design principles and using Shadcn/UI for consistent styling.
- Integrated TanStack Query for efficient data handling and seamless client-side navigation; implemented React PDF for document generation.
- Collaborated via GitLab on version control, code reviews, and feature delivery, ensuring clean, maintainable, and production-ready code.

Data Analyst Intern

Lazimpat, Kathmandu

Whovian Soft Pvt. Ltd

Sep, 2024 - Feb, 2025

- Worked with real-world datasets to support product data management and SEO optimization efforts.
- Performed data cleaning and analysis using Python, Excel, and SQL to derive actionable insights.
- Collaborated on the development of internal tools with Django backend and responsive frontend (HTML, CSS, JavaScript, Bootstrap). This experience strengthened my skills in building user-friendly web interfaces
- Developed key soft skills including problem-solving, collaboration, and attention to detail, which now inform and enhance my front-end development work.

EDUCATION

Bachelors of Science in Computer Science and Information Technology

Lumbini ICT Campus (TU)

Jul, 2021 - Jul, 2025

PROJECTS

AiResvue – AI-Powered Resume Reviewer | React, Tailwind CSS, Firebase, Vite

- Built a responsive web app that allows users to upload resumes for instant AI-driven feedback, including ATS compatibility and scoring across key criteria.
- Integrated GroqApi for AI review and feedback.
- Implemented authentication and dashboard features with Firebase, enabling users to register, log in, logout and track their feedback history.
- Designed a clean, user-friendly interface, ensuring accessibility across devices.

NomYumm - Meal Recipe App | React, Tailwind CSS, Vite

- Built a responsive web app with React Router and state management to search meals, filter by area, and explore detailed recipes with interactive features like “Surprise Me,” dark mode, and favoriting.
- Integrated third-party APIs for dynamic data fetching and designed a user-friendly interface with Tailwind CSS and React Icons.

<https://nom-ym.vercel.app/>

Oshune Skincare Website | HTML, CSS, JavaScript, Vite

- Developed a modern, responsive e-commerce website showcasing curated skincare products with interactive features like quantity selectors, add/delete cart items, and dynamic product listings.
- Implemented semantic HTML for accessibility, CSS3 for styling, and Vanilla JavaScript for dynamic UI interactions and API-based product data handling.
- Designed a responsive layout for desktop and mobile, including a dynamic footer and toast notifications for enhanced user experience.

<https://oshune.vercel.app/>

Travel Website Landing Page | React, Tailwind CSS, Vite

- Developed a responsive, modern landing page by converting Figma designs into a functional React application.
- Built interactive UI components using ReactJS and React Icons, styled with Tailwind CSS for a clean, modern look.
